# URGENT: Market Intelligence & Competitive Alert

**Date:** April 4, 2025 **From:** Global Competitive Intelligence Desk **To:** All Regional Sales Directors, Wholesale Account Managers **Subject:** Competitor Safety Recall - Immediate Wholesale Opportunities

**Executive Summary:** Early this morning, our largest international competitor, *Apex Trail Dynamics*, issued a mandatory, global safety recall on all of their 2024 and 2025 carbon mountain bike frames due to critical weld failures. They have ordered all retailers to immediately pull the stock from their showroom floors.

**Market Impact & Sales Strategy:** This recall has created an immediate vacuum in the wholesale market. Distributors and local bike shops are panic-buying to fill their empty showroom floors ahead of the summer riding season.

**Expected Anomaly:** As a result of our sales team capitalizing on this competitor failure, we anticipate a massive, one-time spike in Wholesale (B2B) revenue specifically for our Mountain Bike product lines throughout the month of **April 2025**.

*Please Note for FP&A:* This 500% surge in mountain bike sales volume is a strictly opportunistic anomaly and should NOT be factored into baseline run-rate projections or quota planning for the upcoming fiscal year.
